40th Edition

March 2025

Three powerful moves: Clean, healthy, safe

Starting the year strong, ExxonMobil Cepu Limited (EMCL) partners at the Cepu Block gathered to discuss safety strategies. Before that, the Bonorejo Village community, alongside EMCL and the Regional Disaster Management Agency (BPBD), held emergency response drills. Similarly, the people of Rengel Village in Tuban and Luwihaji Village in Bojonegoro embraced clean and healthy lifestyles. Let's dive into their stories and see how they made it happen.

Luwihaji Village residents in search of water

Residents of Karangnongko Hamlet, Luwihaji Village, Ngraho Subdistrict, endure the tough journey of crossing the Bengawan Solo River to transport materials for building clean water facilities.

Ramadan and Idul Fitri: Moments of togetherness and safety

We have entered the holy month of Ramadan, a time full of blessings and reflection. Ramadan is the perfect time to strengthen bonds of togetherness, both at work and at home. In this blessed month, we are encouraged to increase awareness of the importance of safety and health, both physical and mental.

As Idul Fitri approaches, let us continue to maintain the spirit of togetherness and mutual care. Workplace safety is a form of love for our families, ensuring that we can all return home safely and celebrate the day of victory with our loved ones.

This edition also reflects the activities of February as Occupational Safety and Health Month (K3), emphasizing the importance of a safety culture and maintaining health in our work environment.

May this Ramadan bring peace and happiness to us all and may Idul Fitri be a moment full of joy and togetherness.

Bonorejo Village: Prepared and resilient in emergency situations

Joint training with Bonorejo Village residents, Gayam Subdistrict, Bojonegoro, evacuated by Bojonegoro BPBD officers during an emergency simulation with EMCL.

No one ever wishes for a disaster, but the possibility is always there. We must always be prepared.

This belief drives the residents of Bonorejo Village, Gayam Subdistrict, Bojonegoro. As a host village of the Banyu Urip Field, the community trains alongside the Bojonegoro Regional Disaster Management Agency (BPBD) and ExxonMobil Cepu Limited (EMCL), the Cepu Block operator.

The Village Head and several residents gathered for a two-day emergency response simulation, ensuring that established procedures could be effectively executed to safeguard both the community and the environment.

Laela Nor Aeny, Head of Bojonegoro BPBD, expressed greater confidence after witnessing this joint exercise. She believes that industrial incident preparedness can be further strengthened through regular training like this. •

After the event, the Head of Bojonegoro BPBD gave a briefing to the residents alongside EMCL's safety and security team and the Bonorejo Village Head.

Health officers from the Health Information Center team, an EMCL partner, exercising emergency situations around the Banyu Urip Field.

Bojonegoro BPBD officers verified the data of local villagers who evacuated during the emergency simulation.

"We believe EMCL already has disaster prevention procedures in place and prioritizes community safety. Even if an incident occurs, this training ensures we know exactly how to respond."

Ending market waste in Rengel Village

Rengel Village's dedicated waste workers, managing the TPS facility built with EMCL's support.

The TPS now handles not only market waste but also household waste from local residents.

Local students visit Rengel's TPS, seeing firsthand how waste management can bring economic value to the community.

Rengel Village Market in Tuban's Rengel Subdistrict is a bustling hub — and with that comes waste. Every day, over 10 tons of organic and inorganic waste pile up, pushing the village government to find a better solution.

For the past two years, the community has transformed its approach. With support from ExxonMobil Cepu Limited (EMCL), the village developed a Temporary Waste Disposal Site (TPS), turning market and household waste into something more valuable. Waste is now sorted, processed, and even generates economic benefits for the village.

This progress didn't stop there. Rengel Village now employs dedicated waste workers, creating jobs, boosting income, and ensuring their health through insurance coverage — a testament to how environmental responsibility can empower a community. •

The waste sorting facility in Rengel, built with support from EMCL, SKK Migas, and the Tuban Regency Government.

"Cleanliness brings blessings. We're committed to expanding this initiative so more people in our village feel the benefits firsthand."

The Banyu Urip contractor leaders launched the 2025 safety commitment

The management leaders of contractors at the Banyu Urip and Kedung Keris fields discussed strategic steps to strengthen a high safety culture in the workplace

The strong safety culture embedded in Banyu Urip and Kedung Keris continues to stand as a shared commitment — upheld by ExxonMobil Cepu Limited (EMCL) and its contractor partners alike.

On February 25, 2025, EMCL held a Contractor Safety Management Workshop, bringing together leaders from 50 partner companies. Each leader pledged to empower their workers to become safety leaders — a commitment sealed with a collective agreement signed by all attendees.

This year's workshop focused on key safety aspects: personal safety, process safety, and leadership within each company's management. Every leader reaffirmed their dedication to achieving a zero-incident work environment.

In a series of focused discussions, the group identified this year's safety priorities and explored improvements to create a safer, more secure workplace.

The event was also attended by key figures, including the SKK Migas Jabanusa Head, the Chair of the Cepu Block Participating Interest Consortium, and the President of ExxonMobil Cepu Limited. ▪

Contractor representatives share stories about workplace incidents and exchange ideas on fostering a safer work environment.

Carole Gall, President of ExxonMobil Cepu Limited, expressed her gratitude and appreciation to the partners who have collaborated and worked hard to ensure reliable, efficient, and safe operations.

Several companies receive awards for their dedication and hard work in promoting safety — ensuring every worker returns home healthy and safe.

A struggle worth the effort! Bringing clean water to a remote area

Residents work hand in hand to build clean water facilities in Karangnongko Hamlet, Luwihaji Village, Ngraho Subdistrict, Bojonegoro.

Community of Karangnongko Hamlet, Luwihaji Village, Ngraho Subdistrict, endured a long and challenging journey — crossing the Bengawan Solo River to transport materials for building clean water facilities. Their spirit of mutual cooperation became the driving force behind turning this dream into reality.

At last, their efforts paid off. Joy radiated from the villagers' faces during the handover of the clean water facility, marking the successful completion of the 2024 Clean Water Development Program initiated by ExxonMobil Cepu Limited (EMCL).

A well, drilled to a depth of 60 meters, now delivers water at a flow rate of 3 liters per second, providing 52 families with reliable access to clean water in their homes.

Muntohar, the Head of Luwihaji Village, shared how both the village government and residents had long struggled to find a clean water source in the area. Now, that long-held hope has become a reality. He expressed his wish for this facility to sustainably meet the community's clean water needs for years to come. •

Villagers enjoy the fresh, clean water flowing in front of their homes — enabling them to live healthier, more hygienic lives.

“We’ve dreamed of having clean water at home for so long. *Alhamdulillah*, today that dream has finally come true.”

Minister of Environment visits Banyu Urip Field

Indonesia's Minister of Environment, Hanif Faisol Nurofiq, chats with local workers at the Central Processing Facility, discussing environmental management at Banyu Urip Field.

ExxonMobil Cepu Limited (EMCL) had the honor of welcoming Hanif Faisol Nurofiq, Indonesia's Minister of Environment and Forestry, to the Banyu Urip Field facilities in the Cepu Block, Bojonegoro.

During the visit, the Minister engaged in discussions with EMCL about air quality, emission reduction initiatives, waste management, and water conservation efforts. He also conducted an on-site inspection of the environmental management practices at Banyu Urip and Kedung Keris.

While touring the facilities, the Minister took time to interact with local workers operating the Central Processing Facility (CPF). He provided guidance and motivation, encouraging everyone to maintain environmental standards at the high levels EMCL upholds. •

"This visit was an opportunity for us to demonstrate how EMCL upholds high environmental management standards at the Cepu Block."

Carole Gall

President of ExxonMobil Cepu Limited

The Principal of SMA Negeri Model Terpadu Bojonegoro showcases the school's waste management program to the Minister. Initiated by EMCL, this program has sparked positive changes in how students, families, and the surrounding community handle waste.

Arief Aryanto, Wells Operations Supervisor (in an orange uniform) explains environmental management efforts at the Banyu Urip Infill Clastic (BUIC) project. He receives guidance, encouragement, and appreciation for their dedication.

Carole Gall, President of ExxonMobil Cepu Limited (EMCL), presents the book "Rising Together" — a collection of inspiring stories from communities and local figures in Bojonegoro and Tuban.

Empowering Bojonegoro students with robotics and technology

While attending the robotics exhibition and seminar, a delegation of elementary school students from Bojonegoro had the chance to meet with Coordinating Minister for Human Development and Culture, Pratikno. The Minister praised their enthusiasm and eagerness to learn.

Fifteen elementary school students from Bojonegoro, East Java, recently experienced an exciting journey into the world of technology by participating in Robotalk — a robotics training and exhibition held in Jakarta on February 3-4, 2025.

ExxonMobil Cepu Limited initiated this program, to supports STEM education — Science, Technology, Engineering, and Mathematics — in the Cepu Block operational area. It aims to inspire the younger generation to explore and embrace technological innovations.

During the event, the students had the opportunity to meet Pratikno, Indonesia's Coordinating Minister for Human Development and Culture. He motivated the students to stay curious, keep up with technological advancements, and master foreign languages — key skills for exchanging ideas and preparing for future careers.

Titis Dwi Rahayu, a teacher from SD Muhammadiyah 2 Bojonegoro, applauded the initiative, calling it an invaluable educational experience that broadened the students' understanding of robotics. Joni Wicaksono, an EMCL representative, emphasized that this program reflects EMCL's ongoing commitment to supporting STEM education in the Cepu Block. He added that the event aims to nurture students' passion, talent, and creativity in robotics, helping them envision a brighter, tech-driven future. •

Bojonegoro's children must master technology and foreign languages, because language is the key to exchanging ideas and knowledge."

Pratikno

Coordinating Minister for Human Development and Culture, Republic of Indonesia

Bojonegoro students enthusiastically join the robotics training and exhibition in Jakarta.

Students practice assembling robot components and programming them to follow instructions and move accordingly.
